PROFESSIONAL SUMMARY

Full Stack Developer and B.Tech CSE student with hands-on experience in the **MERN stack**, API integration, and secure authentication systems. Proficient in **React.js, Node.js, Express.js, MongoDB, and Tailwind CSS**, with a strong focus on building responsive, scalable, and user-friendly web applications. Passionate about optimizing performance, writing clean code, and collaborating in team environments to deliver high-quality software solutions.

SKILLS

- **Programming Languages:** Python, C/C++
- **Frontend:** HTML5, CSS3, TypeScript, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, Material-UI
- **Backend:** Node.js, Express.js, TypeScript, **ML Model Integration**, RESTful APIs, JWT Authentication, bcrypt
- **Databases & Cloud:** MongoDB, MySQL
- **AI & CS Fundamentals:** Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Operating Systems
- **Tools & Practices:** Git, GitHub, API Integration, CRUD Operations, MVC Architecture
- **Soft Skills:** Effective Communication, Team Collaboration, Problem Solving, Time Management, Adaptability

EDUCATION

I.K. Gujral Punjab Technical University, Kapurthala - B.Tech (Computer Science & Engineering)	2022 – 2026 SGPA: 9.13
Darshan Academy, CBSE — Senior Secondary (XII)	March 2022 Percentage: 77%
Darshan Academy, CBSE — Matriculation (X)	March 2020 Percentage: 87%

PROJECTS

CampusConnect – MERN based academic portal with ML model Integration (React, Node.js, Express, MongoDB, ML Model)

- Developed a digital platform for students to access notes, syllabus, e-books.
- Built an admin dashboard to oversee resources, manage user accounts, and process complaints with complete CRUD support.
- Introduced a secure complaint lodging system for students to connect with HODs
- Implemented secure login and data handling mechanisms using JWT and bcrypt.

Neighburly – MERN based Service Marketplace (React, Node.js, Express, MongoDB)

- Developed a community platform where users can **post services require** and connect with nearby **taskers** for task completion.
- Implemented **role-based dashboards** for users and taskers to manage tasks, applications, and service statuses efficiently.
- Designed **secure authentication and data handling** using **JWT and bcrypt**, ensuring user privacy and platform security.
- Integrated a **real-time chat and notification system** to enable seamless communication between users and taskers.

Teacher Feedback Analysis System – MERN based academic evaluation platform (React, Node.js, Express, MongoDB, Chart.js / Recharts)

- Designed and developed a student-driven teacher rating system to get feedback on teaching performance.
- Implemented role-based dashboards where **admins can view aggregated feedback** through interactive graphs
- Visualized ratings and feedback trends using dynamic charts, enabling data-driven performance evaluation.
- Built secure REST APIs for feedback submission and retrieval, ensuring data integrity and scalability.

EXPERIENCE

Intern | GTB Institute– Jalandhar, India (Jun 2024 – July 2024)

- Contributed to **live AI/ML and full-stack MERN projects**, building responsive user interfaces using **React.js, Tailwind CSS, HTML, CSS, JavaScript, and AOS**.
- Designed and developed **end-to-end MERN applications**, implementing RESTful APIs with **Node.js and Express**
- Improved **ML model accuracy** and Collaborated with **Senior teams** to deploy applications and resolve challenges efficiently.
